TARIFF FORMAT

- A. Page Numbering** - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially, however, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.
- B. Page Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th Revised Page 14 cancels the 3rd Revised Page 14. Because of various suspension periods, deferrals, etc., the most current page number on file with the Commission is not always the tariff page in effect. Consult the Check Sheet for the page currently in effect.
- C. Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a).
 - 2.1.1.A.1.(a).I.
 - 2.1.1.A.1.(a).I.(i).
 - 2.1.1.A.1.(a).I.(i).(1).
- D. Check Sheets** - When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the pages contained in the tariff, with a cross reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some pages.) The tariff user should refer to the latest Check Sheet to find out if a particular page is the most current on file with the Commission.

SECTION 1 - DEFINITIONS

Access Line - An arrangement which connects the Customer's location to a TON Services Inc. switching center or point of presence.

Account Code - A number assigned to each Customer Account which serves as the only means of Customer identification and for proper Depletion of Customer Account Balances. (D)

Authorized User - A person, firm, corporation, or any other entity authorized by the Customer to communicate utilizing the Company's service. (D)

Available Account Balance - The amount of usage remaining on a Customer Account at any particular point in time. Each Customer Account has an Initial Account Balance which is stated in either U.S. dollars or Call Units, depending on the type of service. The Available Balance is depleted by the appropriate dollar amount or number of Call Units, respectively, based on the actual usage of the Company's service.

Call Unit - A Call Unit is a measurement of usage, such that a specified quantity of Call Units equate to one minute of usage. For example, one Call Unit may equate to one minute of interstate usage, while several Call Units may equate to one minute of international usage. Call Units are depleted on a per-call, real time basis.

Called Party - The person, individual, corporation, or other entity whose telephone number is called by the End user.

Commission - Alabama Public Service Commission.

Company or Carrier - TON Services Inc. ("TON") unless otherwise clearly indicated by the context.

Cost Deductions - Deductions in the dollar amount remaining on a Customer's debit card caused by using the debit card service.

Customer - Any person, firm, partnership, corporation, or other entity which uses telecommunications services under the provisions and regulations of this tariff and is responsible for payment of charges.

SECTION 1 - DEFINITIONS, (CONT'D.)

Customer Account - A Company account which is not associated with a Local Exchange Carrier switched access business or residential line. Customer Accounts consist of prepaid balances which are depleted on a real time basis during each call placed on each account.

Debit Account - An account which consists of a pre-paid usage balance depleted on a real time basis during each Debit Service Call.

Debit Card - A card issued by the Company which provides the Customer with a PIN and instructions for accessing the Company's network. (T)

Debit Card Service - A communications service provided by the Company. To use debit card service, the Caller must first dial a preassigned toll free (i.e. 800/888) number to obtain access to the Company's network. Once the Caller is connected to the TON network, the caller must then dial an authorization number and then the ten digit number of the called party.

Debit Service Call - A service accessed via a toll free (i.e. "1-800/1-888") number or other access code dialing sequence whereby the Customer or Authorized User dials all of the digits necessary to route a call. Network usage for each call is deducted from the available usage balance on a Company-issued Debit Account.

Depletion - Reductions in the Available Balance based on usage of the Customer Account. Depletion of Dollar-Based service occurs on a real time basis at the tariffed per minute rates contained herein. Depletion of Unit-Based service occurs on a real time basis at the tariffed number of Call Units per minute contained herein.

Dollar-Based Accounts - Service where the Initial Balance and Available Balance is expressed in U.S. dollars. The rates per minute contained in this tariff are expressed in U.S. dollars.

End User - Any person, firm, corporation, partnership or other entity which uses the services of the Company under the provisions and regulations of this tariff. The End User is responsible for payment unless the charges for the services utilized are accepted and paid by another Customer.

Identification Number - A unique numerical code associated with each debit card.

SECTION 2 - RULES AND REGULATIONS**2.1 Undertaking of TON**

TON's services and facilities are furnished for communications originating and terminating within the State of Alabama under terms of this tariff. The Company's services and facilities are available twenty-four (24) hours per day, seven (7) days per week.

TON arranges for installation, operation, and maintenance of the communications services provided in this tariff for Customers in accordance with the terms and conditions set forth under this tariff. TON may act as the Customer's agent for ordering access connection facilities provided by other carriers or entities, when authorized by the Customer, to allow connection of a Customer's location to the TON network. The Customer shall be responsible for all charges due for such service arrangement.

2.2 Use

Services provided under this tariff may be used by the Customer for any lawful telecommunications purpose for which the service is technically suited.

3.5 Public Telephone Surcharge

In order to recover the Company's expenses to comply with the FCC's pay telephone compensation plan effective on October 7, 1997 (FCC 97-371), an undiscountable per call charge is applicable to all interstate, intrastate and international calls that originate from any domestic pay telephone used to access the Company's services. This surcharge, which is in addition to standard tariffed usage charges and any applicable service charges and surcharges associated with the Company's service, applies for the use of the instrument used to access The Company service and is unrelated to the Company service accessed from the pay telephone.

Pay telephones include coin-operated and coinless phones owned by local telephone companies, independent companies and other interexchange carriers. The Public Pay Telephone Surcharge applies to the initial completed call and any reoriginated call (i.e., using the A#@ symbol).

Whenever possible, the Public Pay Telephone Surcharge will appear on the same invoice containing the usage charges for the surcharged call. In cases where proper pay telephone coding digits are not transmitted to the Company prior to completion of a call, the Public Pay Telephone Surcharge may be billed on a subsequent invoice after the Company has obtained information from a carrier that the originating station is an eligible pay telephone.

The Public Pay Telephone Surcharge does not apply to calls placed from pay telephones at which the Customer pays for service by inserting coins during the progress of the call.
